REDBANK VALLEY SCHOOL DISTRICT
MATHEMATICS CURRICULUM MAP

| ALGEBRA II GRADES 10-12 |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Chapter 1-2 | Chapter 2-3 | Chapter 4 | Chapter 5 | Chapter 5-6 | Chapter 11 | Chapter 6-7 | Chapter 7-8 | Chapter 9 |
| SEPTEMBER | OCTOBER | NOVEMBER | DECEMBER | JANUARY | FEBRUARY | MARCH | APRIL | MAY |
| Scatter Plots; <br> Trend Lines; <br> Correlation; <br> Functions \& Function <br> Notation; <br> Basic Graphs \& their <br> Translation; <br> Basic Counting <br> Methods; <br> Categories of <br> Numbers; <br> Slope \& its Interpretation; Human Graphs; Slope Song | Comparison of Direct <br> Variation \& Linear <br> Functions; <br> Graphing One <br>  <br> Inequalities; <br> Graphing Inequalities <br> in Two Variables; <br> Experimental vs <br> Theoretical <br> Probability; <br> Simulations Using <br> Random Number <br> Tables; <br> Organizing Data in <br> Matrices; <br> Matrix Operations; <br> Using Matrices for <br> Geometric <br> Transformation, <br> Networks \& Solving <br> Equations; <br> Coding \& Decoding a <br> Message | Solving Linear <br> Systems by Graphing, Algebraic <br> Methods, <br> Substitution, <br> Elimination, Matrices; <br> Graphing in 3 <br> Dimensions; <br> Solving Systems of <br> Three or More <br> Equations |  <br> Quadratic Models; <br> Finding Maximum or <br> Minimum of <br> Quadratic Functions; <br>  <br> Features of <br> Parabolas; <br> Learn to Complete <br> the Square to use <br> Vertex Form of <br> Parabola Equation; <br> Solve Quadratic <br> Equations by <br> Factoring, <br> by Completing the <br> Square, by the <br> Quadratic Formula; <br> Quadratic Formula <br> Song | Inverse Functions <br> (Square Root) <br> Complex Numbers; <br> Using Power <br>  <br> Inverses; <br> Even \& Odd <br> Functions; <br> End Behavior of <br> Polynomial <br> Functions; <br> Relating the <br> Algebraic \& Graphic <br> Features of <br> Polynomials; <br> Solving Polynomial <br> Functions; <br> Polynomial Long <br> Division; <br> Synthetic Division | Make Probability Distributions; Use Probability Distribution to Conduct Simulations; Use Tree Diagrams \& Formulas to Find Conditional Probability; Quantify Data by Using Box-andWhisker Plots; Define Standard Deviation \& Use to Compare Sets of Data; <br> Study Standard Normal Curve \& Use to Find Probabilities | Pascal's Triangle; Using the Binomial Theorem for Expansion \& for Probability; <br> Combinations; <br> Modeling Exponential <br> Growth \& Delay; <br> Graphing <br> Exponential <br> Functions; <br> Using Exponential <br> Functions for Interest, Growth \& Decay; Introduction to "e", Introduction to Logarithms | Properties of Logarithms; <br> Solving Equations by Using Logarithms; Identify \& Solve Inverse Variation <br> Problems; <br> Graphing <br> Hyperbolas; <br> Work with Rational <br> Expressions; <br> Add/Subtract <br> Multiply/Divide; <br> Solve Rational <br> Equations; <br> Probability of <br> Mutually Exclusive <br> and Independent <br> Events | Introduce Periodic <br> Functions; <br> Find Period, Maximum <br> \& Minimum; <br> Define \& Use Radian <br> Measure of Angles; <br> Use Unit Circle to <br> Define Sine \& Cosine <br> Functions; Define <br> Tangent Function; <br> Use Trig Functions to <br> Solve Triangles; <br> Law of Sins; <br> Law of Cosines |
